REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The Applicant claims a fuel cell assembly comprising at least one groove network extending through the fuel cell assembly and including at least one filling port for the groove network, and a seal within each groove network that has been formed in place after assembly of the separate elements, wherein the seal provides a barrier between at least two of the separate elements to define a chamber for a fluid for operation of the fuel cell.

Applicant claims an electrochemical cell assembly comprising at least one groove network extending through the electrochemical cell assembly and including at least one filling port for the groove network, and a seal within each groove network that has been formed in place after assembly of the separate elements, wherein the seal defines a barrier between at least two elements to define a chamber for a fluid for operation of the electrochemical cell assembly.

The prior art of record, Schmid et al., U.S. Pat. No. 6,080,503 teach a fuel cell assembly comprising a groove network and provides adhesive bonds between different layers and elements within a fuel cell stack.

However, the prior art of record does not suggest a groove network, including a filling port for the groove network, extending through the fuel cell assembly. Additionally, the prior art of record does not disclose a seal within each groove network that has been formed in place after assembly of the separate elements.

Art Unit: 1745

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
